Professional Summary

Full Stack Developer with 5+ years of experience building scalable SaaS applications and web platforms using PHP, Laravel, Vue.js, and React.js. Experienced in backend development, REST APIs, billing systems, third-party integrations, and database optimization. Strong background in debugging production systems, improving application performance, and delivering scalable solutions across cross-functional teams. Skilled in leveraging AI-assisted development tools such as Cursor, Claude Code, and ChatGPT to accelerate engineering productivity.

Technical Skills

Languages: PHP, JavaScript

Frameworks & Libraries: Laravel, Vue.js, React.js, Filament, JQuery, Bootstrap, Tailwind CSS

Databases: MySQL, PostgreSQL

Cloud & DevOps: AWS EC2, RDS, CloudFront, CloudWatch, Jenkins

APIs & Integrations: REST APIs, Stripe Payment Gateway, Auth0, Google Maps API, Google Places API

Tools: Git, GitHub, GitLab, Jira, Azure DevOps, PhpStorm, VS Code

Concepts: MVC Architecture, API Integration, RBAC, Database Optimization, Responsive Design

AI-Assisted Development: Cursor, Claude Code, ChatGPT

Professional Experience

Bacancy Software LLP

Software Engineer

April 2025 – Present

Ahmedabad, India

- Designed and delivered scalable web application features, reusable system components, and configurable admin workflows with strong focus on maintainability, performance, and clean architecture.
- Led debugging, root cause analysis, and production issue resolution across complex business workflows while optimizing application performance, database operations, and overall system reliability.
- Collaborated directly with clients, product stakeholders, and cross functional teams to gather requirements, provide technical solutions, communicate progress, and deliver high quality feature enhancements.
- Implemented secure access control, validation, and workflow management solutions for enterprise applications while following best practices in software design, code quality, deployment, and version control.
- Leveraged AI powered development tools including Claude and ChatGPT to accelerate feature development, streamline debugging and root cause analysis, improve code quality, and increase overall engineering productivity across complex projects.

Entrata

Software Engineer

Jan 2024 – April 2025

Pune, India

- Contributed to automated billing workflows for a SaaS-based platform, improving billing accuracy and operational efficiency based on lease status management.
- Debugged and resolved critical production issues within large-scale codebases, improving application reliability and reducing recurring failures.
- Optimized database queries and backend logic to improve application scalability, response times, and overall system performance.
- Collaborated with stakeholders to gather business requirements, translate them into technical solutions, and support testing and deployment activities.

Sofmen Technologies Pvt Ltd

Full Stack Developer

March 2021 – Dec 2023

Indore, India

- Designed and developed scalable web applications using PHP, Laravel, and Node.js while collaborating with cross-functional teams and clients.
- Troubleshoot complex implementation issues in Laravel and CI environments, ensuring seamless integration between frontend and backend systems.
- Developed and maintained REST APIs, backend services, and core application features with focus on maintainability and application quality.
- Participated in requirement discussions, sprint planning, client communication, and feature delivery across multiple web projects.

Projects

FranApp — PHP, Laravel, JQuery, Datatable, Stripe, Ajax

- Managed the admin platform for franchise billing, reporting, and franchisee job management across multiple business units.
- Integrated Stripe subscription-based payment workflows for premium service access and recurring billing management.
- Designed and developed KPI tracking and reporting modules for monitoring franchisee performance metrics.
- Collaborated directly with clients for requirement gathering, product demonstrations, and feature implementation.

Everlease — PHP, Laravel, Vue.js, MySQL

- Developed a vehicle rental platform with role-based access control, rental listing management, and inventory-based workflows.
- Implemented real-time notifications and chat functionality to improve communication between renters and dealers.
- Built advanced vehicle search and filtering features based on credit score, mileage, drivetrain, and pricing criteria.

TheWayApp — PHP, Laravel, Tailwind CSS, REST APIs

- Developed and maintained the admin panel for managing users, subscriptions, authentication, and video content workflows.
- Implemented backend APIs and subscription management functionality for Android and iOS applications.
- Managed in-app purchase and subscription workflows using Laravel-based backend services.

Wallaby Windows — PHP, Laravel, Google Maps API

- Developed franchise locator functionality using ZIP code-based search and interactive Google Maps integration.
- Integrated Google Places API for dynamic autofill of address-related fields to streamline booking workflows.
- Implemented custom map marker functionality for franchise microsites and location discovery features.

Education

International Institute of Professional Studies, DAVV

Master of Technology (Integrated), Information Technology — CGPA: 7.35

2016 – 2021

Indore, India

Certifications

- Earned LinkedIn Skill Badges in PHP, Java, C++, and MySQL

Languages

- English, Hindi, Marathi
